Experience, Range of Projects, Adaptability

Information, Visualization and Innovative Research (IVIR, Inc.) specializes in [research](#) and development in education, medical education, modeling and [simulation](#). Contact us as to how we can best support your requirements. Email info@ivirinc.com or go to www.ivirinc.com.

Featured Innovator

Our featured team member has 20 years of experience in project management, marketing, and product development. A program manager, Dee Kuenzig, has experience in bio-mechanics and the optimization of prosthetic design. An innovator, Dee has a passion for helping people and focuses her efforts on patient safety. Motivation for her work stems from her interest in simulation coupled with the fact that “the projects we work on have the potential to help people.”

Wide Range of Experience

IVIR has had the good fortune to support a wide range of projects for military and civilian clients. Included is a project that focused on canine medical care research. The mission was to investigate curricula, programs of instruction and doctrine to establish educational and skills requirements based on desired outcomes for specific skills performance. The effort aimed to provide documentation of the educational needs and technology gaps for training Soldiers to successfully render care to military working dogs (MWDs) and Operational Canines (OCs).

Changes in Medical Education

Even though education may look very different these days, IVIR's innovative solutions and research continues to support the medical community. How can we help? Contact us about [curricula development](#), remote learning, [medical modeling, simulation](#) or other medical education resources for an ever-changing and safe learning environment.
